# MEMORANDUM

To: Cindy Gagné, Mayor

From: Ken Mears, Public Works Director

Date: May 17, 2021

Subject: **Resolution No. 25-2021** Approving an agreement for 2021 Camp Host.

---

The Attached Resolution: **25-2021, A Resolution of the Omak City Council Approving a Professional Services Agreement for Camp Host at Carl Precht RV Park,** is forwarded for your consideration.

The Public Works Department has been searching for a Camp Host to aid at the Carl Precht Memorial RV Park, helping patrons with their online reservation and providing local information about the City.

The Camp Host would start on May 18<sup>th</sup>, 2021, through October 31<sup>st</sup>, 2021.

I support this resolution.

**RESOLUTION No. 25-2021**

**A RESOLUTION OF THE OMAK CITY COUNCIL APPROVING A  
PROFESSIONAL SERVICES AGREEMENT FOR CAMP HOST AT CARL  
PRECHT MEMORIAL RV PARK**

**WHEREAS**, Professional Services are needed to assist Public Works Department in the operation and administration of the Carl Precht Memorial RV park; and

**WHEREAS**, sufficient City resources are not available to provide such services; and

**WHEREAS**, Public Works has selected an eligible service provider through advertisement and an interview process; and

**WHEREAS**, specific service needs are identified in the Camp Host Professional Service Agreement.

**NOW, THEREFORE, BE IT RESOLVED**, the City Council of the City of Omak does hereby approve the Camp Host Professional Service Agreement, attached hereto as exhibit "A", between the City of Omak and Rachael Willis, for the 2021 season effective May 18, 2021, through October 31, 2021. The Mayor is hereby authorized to execute the Agreement.

**PASSED BY THE CITY COUNCIL** this \_\_\_\_ day of \_\_\_\_\_, 2021.

**APPROVED:**

\_\_\_\_\_  
Cindy Gagné, Mayor

**ATTEST:**

\_\_\_\_\_  
Connie Thomas, City Clerk

**APPROVED AS TO FORM:**

\_\_\_\_\_  
Michael D. Howe, City Attorney

## CAMP HOST

### PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT made and entered into this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_, by and between the City of Omak, Washington, a municipal corporation, hereinafter referred to as the "City", and \_\_\_\_\_, hereinafter referred to as the "Service Provider".

#### RECITALS

Whereas, the City desires to have certain services and/or tasks performed as set forth in the "job Description" attached hereto; and

Whereas, sufficient City resources are not available to provide such services; and

Whereas, the Service Provider represents that the Service Provider is qualified and possesses sufficient skills and the necessary capabilities to perform the services and/or tasks set forth.

Now, therefore, in consideration of the terms, conditions, covenants, and performance contained herein,

The parties hereto agree as follows:

1. **Scope of Services.** The Service Provider shall perform such services and accomplish such tasks as are identified and designated in the "Job Description" attached hereto as Exhibit "A" and incorporated herein as though fully set forth.
2. **Term.** The services as Campground Host shall begin on May 18, 2021 and shall run through October 31, 2021.
3. **Compensation.** Payment for services shall be as set forth in the paragraph entitled "Benefits" in Exhibit "A".
4. **Independent Contractor Relationship.**
  - 4.1 In the performance of the services herein contemplated the Service Provider is an independent contractor with the authority to control and direct the performance of the details of the work, however, the results of the work contemplated herein must meet the approval of the City and shall be subject to the City's general rights of inspection and review to secure the satisfactory completion thereof.
  - 4.2 The City is interested primarily in the results to be achieved. The implementation of services will lie solely with the discretion of the Service Provider. The Service Provider shall not be deemed to be an employee.

5. **Hold Harmless Indemnification.**

11. Entire Agreement. The parties agree that this Agreement is the complete expression of the terms hereto and any oral representations or understanding not incorporated herein are excluded. Further, any modification of this Agreement shall be in writing and signed by both parties. Failure to comply with any of the provisions stated herein shall constitute material breach of performance of the provisions of this Agreement. It is also agreed by the parties that the forgiveness of the nonperformance of any provision of this Agreement does not constitute a waiver of the provisions of this Agreement.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be executed the day and year first hereinabove written.

CITY:

City of Omak, a municipal corporation:

## **Camp Host Needed for 2021 Summer Season**

**Duties:** Camp Host  
**Compensation:** FHU and Salary

Campground Host: Duties will include but are not limited to the following:

- Serve as liaison between park users & park staff.
- Greet and assist visitors, answer questions, and explain regulations which apply to them. May assist campers in locating a campsite, be familiar with local points of interest and the location of services that might be requested by campers such as towing, groceries, churches, tourist attractions and local events.
- Will perform light maintenance work around the campground such as litter pickup, sweeping and stocking of restrooms, provide information to park staff on potential problems, and share information to campers as needed.
- May assist in campground public relations, educational activities, and special events/activities.
- Clean campsites by performing minor maintenance tasks such as raking the campsite pad, washing tables, picking up litter, reporting any damage to your supervisor.
- Host shall not attempt to discipline or apprehend any park violators. Host will report all disturbances to park staff. Law enforcement will be done by city and tribal police only.
- You are to inform campers of rules and regulations when asked, but are not to participate in any high-risk activity.
- Host must set an example by being a model camper practicing good housekeeping at all times in and around their assigned site and by observing all rules and regulations.
- Be observant for activities within the campground requiring immediate attention - ranging from a tree needing to be trimmed to a problem camper. Notify the park manager as these problems arise.

Other minor tasks that will be asked of a Campground Host:

- \* Sweep cobwebs from buildings
- \* Keep track of occupied or vacant campsites
- \* Direct campers to vacant sites
- \* Remind campers to register
- \* Assist campers with camper reservation process \* Keep a written report of complaints and criticism of park facilities, report situations that could affect the health and safety of visitors, and report any maintenance items which need immediate attention. May maintain other written records as requested by the Park Manager.

**Working Conditions:**

Work is mostly outside in hot, cold, wet, humid, or windy conditions. Walking or bicycling is required. Must reside in campground.

**Benefits:**

The use of a campsite and all utilities at no charge for the duration of the term of service, a \$900 dollars per month value. And a monthly salary will be offered from April through September.

publicworks@omakcity.com

[http://www.omakcity.com/rv\\_park.html](http://www.omakcity.com/rv_park.html)

5.1 Service Provider shall defend, indemnify, and hold the City, its officers, officials, employees, and volunteers harmless from any and all claims, injuries, damages, losses, or suits, including attorney fees, arising out of, or resulting from the acts, errors, or omissions of the Service Provider in performance of this Agreement, except for injuries and damages caused by the sole negligence of the City.

5.2 No liability shall attach to the City by reason of entering into this Agreement except as expressly provided herein.

6. **Compliance With Laws.** The Service Provider, in the performance of this Agreement, shall comply with all applicable federal, state, or local laws and ordinances.

7. **Changes.** Either party may request changes to the scope of service to be provided hereunder, however, no change or addition to this Agreement shall be valid or binding upon either party unless such change or addition be in writing and signed by both parties. Such amendments shall be attached to and made part of this Agreement.

8. **Extension and/or Termination.**

8.1 This Agreement may be extended by mutual written consent of both parties. Service Provider has no authority to and will not engage in compromise settlement arrangements without written authorization from Client.

8.2 Termination of Convenience. The City may terminate this Agreement, in whole or in part, at any time by giving seven (7) days written notice to the Service Provider.

8.3 Termination for Cause. If the Service Provider fails to perform in the manner called for in this Agreement, or if the Service Provider fails to comply with any other provisions of this Agreement and fails to correct such noncompliance within five (5) days written notice thereof, the City may terminate this Agreement for cause. Termination shall be affected by servicing a notice of termination on the Service Provider setting forth the manner in which the Service Provider is in default.

9. **Attorney Fees and Costs.** If any legal proceeding is brought for the enforcement of this Agreement, or because of a dispute, breach, default, or misrepresentation in connection with any of the provisions of this Agreement, the prevailing party shall be entitled to recover from the other party, in addition to any other relief to which such party may be entitled, reasonable attorney's fees and other costs incurred in such action or proceeding.

10. **Jurisdiction and Venue.**

10.1 This Agreement has been and shall be construed as having been made and delivered within the State of Washington, and it is agreed by each party hereto that this Agreement shall be governed by laws of the State of Washington, both as to interpretation and performance.

## LETTER OF TRANSMITTAL

---

---

**TO:** COUNCIL MEMBERS, MAYOR CINDY GAGNÉ, CITY ADMINISTRATOR  
AND CITY CLERK

**FROM:** STACEY OKLAND, CHAIR, OMAK PLANNING COMMISSION

**SUBJECT:** PLANNING COMMISSION RECOMMENDATION OF APPROVAL OF AN  
UPDATED TRANSPORTATION ELEMENT

**DATE:** 5/5/2021

**CC:** PROJECT FILE

---

The City of Omak Planning Commission, in conformance with Title 19.05 OMC, held an open record public hearing on May 4, 2021 to consider an updated Transportation Element of the Omak Comprehensive Plan. The attached staff report (attachment A) provides details on the Planning Commission's efforts to prepare the updated element.

A "strike-out" copy of the revised Transportation is included in Attachment B.

"A motion was made by Commissioner Munding recommend approval of the Transportation with the following modifications and Findings of Fact and Conclusions presented in the staff report.

#### Modifications

1. Add the word formerly before calcium carbonate in the fourth paragraph on page B-4 of the draft element.
2. In Table B.3 on page B-15 the design standards of locally classified Roads need to right-of-way widths reduced to 40-50 feet.
3. The pedestrian bridge planned to parallel the SR 155 Bridge needs to be added to Maps B7 and B8.

Commissioner Harrison seconded the motion which passed unanimously."

Stacey Okland, Chair

**Attachment A – Staff Report**

**CITY OF OMAK  
STAFF REPORT  
UPDATED TRANSPORTATION ELEMENT**

**TO:** PLANNING COMMISSION  
**FROM:** KURT DANISON, CONTRACT PLANNER  
**SUBJECT:** UPDATED TRANSPORTATION ELEMENT  
**DATE:** 4/28/21

\*\*\*\*\*

**Applicant:** City of Omak

**Project Description:**

The City Planning Commission, with the assistance of the City Planning Consultant and Building Official has completed the process to review and revise the Transportation Element of the Omak Comprehensive Plan to better reflect current conditions, integrate recent transportation study results and update data.

**Chronology:**

The Planning Commission, as directed by the City Administrator at its November 2019 meeting, began the review and revise process by reviewing a 2019 study of the intersections along US 97 in the City in January 2020. Due to the COVID Pandemic, work was halted until July 2020. As a result, the Commission began the process of review the complete Transportation Element beginning in August 2021. The Commission reviewed each of the intersections and the study’s recommendations one at a time beginning with the intersection of Sandflat Road and US 97.

As the Commission was reviewing and providing recommendations on the desired strategies for addressing future traffic at the key intersections along US 97, the Planner was going through the balance of the Element updating data, editing and formatting and revising recommendations to eliminate completed projects, add new projects and insert the Commission’s recommendations for the key intersections.

The Commission began review of the complete DRAFT updated Transportation Element at its January 2021 meeting. The Commission reviewed the Element at its February and March meetings recommending minor revision and corrections. At the April 6, 2021 the Commission passed a motion to set a public hearing on the revised Element for May 4, 2021.

### **Applicable Codes and City Standards:**

Amendment of the Comprehensive Plan is a Type V, or legislative action. The amendment process is provided in the Comprehensive Plan.

### **SEPA, Critical Areas and Shorelines:**

The Transportation Element covers the entire city and includes shorelines and critical areas. A SEPA Checklist has been completed and the Building Official issued a DNS on March 29, 2021 with comments or appeals due on April 28. As of the date this staff report was prepared, no appeals of the DMS received and comments have focused on the Element, not the SEPA document/

### **Planning Commission Public Hearing:**

The City of Omak Planning Commission is holding an open record public hearing on May, 2021.

### **Comments Received:**

The application and related materials were mailed or e-mailed to commenting agencies (see list in project file). As of the date this staff report was prepared, comments had been received from the following: Erin Mundinger (Planning Commissioner), Max Platts (Aviation Planner, WSDOT), Max Nelson (Transportation Planner, WSDOT) and Anna Randall (Okanogan County Public Works). It is important to note that the written comments are not due until April 28, 2021 and the comment period is open until the May 4, 2021 Public Hearing.

Copies of all comments are contained in the project file.

**Commenting Agent or Individual:** Erin Mundinger, PC member

**Nature of Comment:** Noted inconsistencies and missing information

**Response:** *Changes should be made as noted.*

**Commenting Agent or Individual:** Max Platts (Aviation Planner, WSDOT)

**Nature of Comment:** Noted that changes to the land use plan for land adjacent to the airport requires coordination with WSDOT.

**Response:** *The comment is not necessarily pertinent to the update of the transportation element as there are no changes to land use designations or recommendations for projects that would be detrimental to the aviation*

**Commenting Agent or Individual:** Max Nelson (Transportation Planner, WSDOT)

**Nature of Comment:** Suggested that the pedestrian bridge planned to parallel the SR 155 (Central Avenue Bridge) be added to the planned pedestrian improvements map.

**Response:** *Add the bridge to the map and list of recommendations.*

**Commenting Agent or Individual:** Anna Randall (Okanogan County Public Works)

**Nature of Comment:** Concerned that access to County Shop not be impacted during planned improvements to Sandflat and US 97.

**Response:** *No change required.*

### **Recommendation by Planning Staff:**

Planning staff recommends that the Planning Commission take the following action:

Move to recommend approval of the Transportation with the following modifications and Findings of Fact and Conclusions presented in the staff report.

#### Modifications

4. Add the word formerly before calcium carbonate in the fourth paragraph on page B-4 of the draft element.
5. In Table B.3 on page B-15 the design standards of locally classified Roads need to right-of-way widths reduced to 40-50 feet.
6. The pedestrian bridge planned to parallel the SR 155 Bridge needs to be added to Maps B7 and B8.

### **Findings of Fact:**

The Planning Commission finds and concludes the following:

1. Chapter 35A.63 of the Revised Code of Washington establishes the City of Omak as the authority with jurisdiction on local comprehensive plan decisions.
2. The review and revise process was initiated at the direction of the City Administrator.
3. Four written comments were received during the required review process.
4. A SEPA Determination of Non-Significance was issued on March 29, 2021.
5. The proposed amendments to Transportation Element are consistent with the intent, goals and policies of the Land Use Element of the City of Omak Comprehensive Plan.
6. Public Notice requirements regarding the May 4, 2021 public hearing on the revised Transportation Element have been completed. The affidavit of publication for said notice is contained in the project file and is part of the record.

7. The File of Record, Staff Report, and exhibits were received, admitted into the record and considered by the Planning Commission.
8. Any Conclusion of Law that is more correctly a Finding of Fact is incorporated herein as such by this reference.

## **Conclusions**

1. The Planning has the authority to recommend amendments to the Comprehensive Plan.
2. The City Council has authority to adopt amendments to the Comprehensive Plan and Maps.
3. The Transportation Element addresses motorized and non-motorized transportation in the city of Omak and its Urban Growth Area.
4. The Transportation Element as recommended by the Planning Commission is consistent to the overall goals and policies of the Comprehensive Plan.
5. Any Finding of Fact that is more correctly a Conclusion of Law is incorporated herein as such by this reference.

**Attachment B – Transportation Element and Maps**

**MINUTES  
OMAK PLANNING COMMISSION  
ZOOM HYBRID MEETING  
MAY 4, 2021**

---

**Call to Order:**

Chairwoman Okland called the meeting of the Omak Planning Commission to order at 5:30 p.m. and a quorum was established.

**Commissioner & Administrative Personnel:**

Sheila Harrison	Kurt Danison, Contract Planner
Stacey Okland, Chair	Tyler Wells, Building Official - absent
Erin Munding	Connie Thomas, City Clerk
Barry Hansen	Amanda Dickinson, Deputy Clerk
Anne Potter	
Jack Schneider	

**Approval of Minutes:**

Commissioner Potter moved, seconded by Commissioner Hansen to approve the April 6, 2021 meeting minutes as written. The Commissioners voted and unanimously approved the motion.

**Public Hearing:**

**Transportation Element of the Greater Omak Area Comprehensive Plan**

Chairwoman Okland opened the public hearing at 5:32 pm. She read the disclaimer letting everyone in attendance know that they will have the opportunity to be heard and that the hearing was being recorded. There were no members of the Commission that recused themselves nor did they have any financial interest in the outcome of the hearing. She asked Contract Planner Kurt Danison to present the staff report. Mr. Danison explained that the Greater Omak Area Comprehensive Plan represents a twenty-year vision as to what the community is going to do over time. The Transportation Element is one element in the Comprehensive Plan. This element provides information for new or improved roads, pedestrian ways etcetera. Mr. Danison read into the record, the Staff Report in its entirety along with reviewing the comments that were submitted (see attached). The recommendation by the Planning Staff is that the Planning Commission move to recommend approval of the Transportation Element with modifications and Findings of Fact as presented in the staff report (attached). Chairwoman Okland thanked Mr. Danison and then opened the floor to audience comments. Chairwoman Okland noted for the record that there was no one from the public to provide testimony. Chairwoman Okland asked if the Planning Commission or the consultant had anything further to add. There were no further questions or comments. Mr. Danison told the Commission that he appreciates the effort that everyone put into the element. There were a lot of meetings and looked at intersections and there were some good conversations. The City should be very proud of the Commissioners willing to spend their time reviewing the element. This plan is very important as recently Senator Patty Murray, Congressman Dan Newhouse and Congresswoman McMorris-Rogers put out a request for projects because congress may fund infrastructure. The earmarks have been put back in to allow each individual Congressman can write into any agencies budget, specific projects. The City of Omak applied for an airport reservoir and received funding from the Legislature. Congressman Newhouse put on his list a health and sciences center for Wenatchee Valley College, Omak. This project is estimated at 2.8 million dollars. Having the Greater Omak Comprehensive Plan in place listing projects the City wants to see done, it makes it easier to apply for funds. Chairwoman Okland closed the public testimony of the hearing at 5:50 pm. She asked if there was any discussion amongst the Planning Commission and there was nothing further. Commissioner Munding moved, seconded by member Harrison to recommend approval of the Transportation Element with the proposed modifications and Findings of Fact presented in the staff report. The Commissioners voted and unanimously approved the motion.

**Other Business:**

**City Update**

Contract Planner Danison told the Commission that Building Official Wells has been active with inspections of Meadowlark and Meadow Point. In addition, he and Fire Chief Bowling are doing a lot more business inspections for health and safety. He also told the Commissioners that he attended a significant meeting with City Planners Chris Johnson, Rocklyn Culp, County Planner Pete Palmer and County Commissioner Chris Branch. The local Planners have not met in years but, they got together to work on the Okanogan County Comprehensive Plan update. He explained that County

**MINUTES  
OMAK PLANNING COMMISSION  
ZOOM HYBRID MEETING  
MAY 4, 2021**

---

Planner, Pete Palmer has been working hard to prepare a baseline Comprehensive Plan to comply with a court order requiring the County to adopt a plan. He also shared with the Commissioners that FEMA has an ongoing effort to update the flood maps for Okanogan County. He explained the City has a levy that has been certified by the Army Corps of Engineers but, FEMA is requiring proof the levy is certified. City Staff has been working to located documents to support the certification. The change is still several years out. He also shared that Economic Alliance received an \$80,000 grant to fund businesses affected by COVID. Their agency has hired a bilingual employee to help facilitate disbursement of those funds.

Commissioner Potter asked about the status of the Colville Confederated Tribes healthcare center. Mr. Danison said that three or four different engineering firms have reached out for water and sewer information but, the City has not been provided enough information to determine if the proposed infrastructure can be served. Commissioner Potter also inquired about the development of Jonathan Street through to Quince Street. Mr. Danison was under the assumption the street would go through to Quince. He will confirm with City staff.

Commissioner Hansen asked about the Capital Facilities Plan (CFP) and if it could be included on the June agenda. Mr. Danison proposed the June agenda include a CFP Workshop and the Public Utilities Element of the Comprehensive Plan. All members were in agreement.

As there was no further business, the meeting was adjourned at 6:12 p.m.

**SIGNED:**

Connie Thomas, City Clerk

## PLAN ELEMENT B: TRANSPORTATION/CIRCULATION

The movement of goods, services, and people to and through the Planning Area plays a large role in the quality of life experienced in our community. Traffic congestion and unsafe pedestrian and non-motorized transportation corridors detract from the rural, small town feel that Omak residents value. A well-maintained, safe, and efficient transportation/circulation system, for motorized and non-motorized uses can go a long way towards protecting the rural lifestyle even with increased population growth.

Omak's street system contains roughly 28 miles of roadway within the incorporated city limits (see Table B.1 for inventory data). This total does not include those portions of US 97, SR 155, and SR 215 within the city limits, which comprise approximately another 5 miles of road. Of these 28 miles, approximately 8.3 miles have curb and gutter, and an estimated 4.2 miles have curb, gutter and sidewalk.

It should be noted that throughout the city, there are many streets with a “mix and match” combination of improvements. For example, Douglas Street going northerly from Central Avenue on the ~~north-south~~ side of the Omak Middle School has curb and sidewalk on both sides of the street to Apple Avenue, and then only sidewalk on the west side to Bartlett Avenue. On Bartlett Avenue, there is curb and sidewalk between Main and Ash on both sides; between Ash and Birch, there is still curb and gutter on both sides, but only sidewalk on the north side; then at its intersection with Elm Street, there is still curb and gutter on both sides, and a sidewalk along the northerly and westerly side of the street that goes southerly to a point just north of 2<sup>nd</sup> street. (At or about West Apple Avenue, Bartlett Ave. becomes Granite Street). From 2<sup>nd</sup> Street southerly, Granite/Jasmine has curb and gutter only to 6<sup>th</sup> Street. Fourth Avenue westerly from Cedar Street to Jasmine has curb only on both sides but no sidewalks. In the Wildwood neighborhood in northwest Omak, there is curb and gutter throughout, but sidewalks on only one side of the streets, and only in select places.

While most residential access streets are BST surfaced, the City ~~had, until recently, has~~ been striving to upgrade approximately 2.0 miles of streets with asphalt surfacing each year ~~before - b-~~ Budget constraints and the need for matching funds for significant street improvements (e.g. ~~Jasmine, Engh Road, Ross Canyon and Oak Street~~) ~~has meant that resulted in~~ the dollars ~~previously~~ allocated for asphalt overlays on local major and minor collectors ~~to be used as match for the larger projects has been diverted~~. State routes and new streets and roads are primarily paved with asphalt.

Comprehensive planning seeks to link transportation/circulation improvements with current and projected land uses. The transportation/circulation system in the Greater Omak Area has changed significantly in the past ~~two-three~~ decades, especially given the tremendous growth in commercial and residential development in the northeastern portion of the City ~~and residential development in the unincorporated areas to the north and west on the “flats”~~. While the existing system is almost exclusively bound to ~~motorized modes of vehiele~~ transportation, there is a growing demand for safe and convenient pedestrian and bikeways in the area.

**Table B.1 – Street Inventory**

Functional Class	City Miles	UGA Miles
Major Arterial (US 97)	1.8	1.1
Minor Arterial (SR 155 & SR 215)	3.9	0.8
Major Collector	0.7	2.2
Minor Collector	1.8	5.0
Local Major Collector	6.4	2.0
Local Minor Collector	4.9	4.7

Several studies and planning efforts have impacted the development and updating of the this plan element and the transportation system in the Omak Area. Transportation Element. These include: the North Central Regional Transportation Plan (1998); Okanogan County Transportation Element (1996); Northwest Omak Transportation Study (1997); Central Okanogan Valley Transportation Study (1994); Okanogan County Transit Authority Comprehensive Transit Plan (1997); Omak-Okanogan Greenway Trail Concept and Analysis (1994); SR-215 Corridor Study (1998); ~~and most recently Omak Airport Layout Plan (2007); the~~ Eng Road and US 97 Traffic Study (2009); NCRTPO Okanogan County Transit Study (2012); TRANGO Transit Development Plan 2019 -2024 (2019); and, US 97 Omak Area Transportation Study, WSDOT (2019). The implications of these studies for comprehensive planning are summarized below.

The North Central Washington Regional Transportation Plan examined the transportation network in the entire region mainly addressing routes of regional significance. This regional plan was developed using Okanogan County's Transportation Element (1996) as a building block; its goals and policies were broad since the intent was to incorporate the interests of the entire region. The Okanogan County Transportation Element was the first plan to address a coordinated transportation system that ~~includes~~ included all jurisdictions and unincorporated rural areas in the county. Omak's transportation planning seeks to be consistent with regional and county standards.

The Central Okanogan Valley Transportation Study (COVTS) examined existing and future traffic conditions for the Omak/Okanogan area's transportation facilities. While, at the time of completion, the study found few problems with existing levels of service and accident histories, the projections for 2000 and 2010 raised concerns about several roadways and intersections within Omak's planning area. SR-215 (Riverside Drive) from US ~~Highway~~ 97 to Downtown Omak; SR-215 between Omak and Okanogan; and SR-155 west of ~~Highway~~ US 97 were identified in 1994 as likely to exceed acceptable levels of service by 2010. Intersections at SR-215 and Omache Drive, SR-215 and Quince, SR-215 and Euclid, SR-215 and Ross Canyon Road, and US 97 and Dayton were all projected to exceed acceptable levels of service by 2000.

Fortunately, a combination of improvements (signal at Dayton/US 97, pedestrian signal at Oak St/SR 215 and realignment of Ross Canyon Rd/SR 215 and projections that overstated the potential increases in traffic volumes ~~resulted~~ resulted in most of the listed intersections still functioning within desired levels of service. It is important to note that these intersections should continue to be monitored ~~into the future~~ and steps taken when needed to address traffic-transportation related impacts.

The Northwest Omak Transportation Study (NWOTS), completed in 1997, was conducted to anticipate changing transportation needs resulting from development of Wildwood and Eagle View in northwest Omak. The study involved cooperation by City of Omak, City of Okanogan, Okanogan County, WSDOT, Colville Confederated Tribes, North Omak Partnership, and other private development interests. Recommendations

stemming from the study include, signalization of three intersections with SR-215--Quince, Dewberry, and Robinson Canyon Road-by the year 2000, and channelization to restrict southbound left turns from Omache Drive to SR-215 and widening of SR-215 to five lanes from Highway 97 to Downtown Omak by the year 2015. Fortunately, as with the COVTS, most of the recommended improvements have not be necessary to date, but will merit continued consideration as the community grows.

Phase 1 of the SR-215 Corridor Study was completed in November of 1998. This plan addressed the particular significance of SR-215 as the main arterial and intercity connection for the cities of Omak and Okanogan. Many of the improvements recommended in the above studies are along the SR-215 corridor. Comprehensive planning and improvements along this corridor ~~continues to be is~~ vital to the long-term ease of travel in the Greater Omak area.

The flurry of transportation planning and studies in the late 1990's led to several significant improvements being completed. Two WSDOT funded projects have provided a sidewalk along the length of one side of SR 215 from the vicinity of Mid Valley Hospital on the south to the intersection of SR 215 and Quince in the north; Ross Canyon Road has been reconstructed and realigned to facilitate future signalization and improve turning movements; Oak Street/Robinson Canyon Road has been rebuilt from SR 215 north to the top of the grade; signalization and improvements to Engh and Omak River Roads (resulting from WalMart Supercenter and Home Depot); improved signage directing northbound traffic to US 97 via Koala and Shumway; installation of a traffic signal and pedestrian crossing at US 97 and Dayton Street; installation of sidewalks along SR 155 adjoining Eastside Park from the Visitor Center to the Central Avenue Bridge; and, installation of a pedestrian activated crossing signal at Oak Street/SR 215.

Beyond the noted projects, efforts to improve motorized transportation ~~since the early part of the last decade over the last 25+ years~~ have focused on three primary areas: the intersection of US 97 and SR 215 and the adjoining street system; ~~and~~ replacement of the Central Avenue Bridge; and, completion of a sidewalk linking East Omak Elementary with the Middle/High School Campus.

In 2009, the City retained USKH to analyze and provide options for addressing increasing traffic issues in the vicinity of Engh Road and US 97. The resulting study contains detailed options with preliminary cost estimates for a range of improvements including increasing the profile of SR 215 and Engh Road up to 5 lanes from Quince Street east of the Omak River Road, extension of turn pockets on Engh Road and improvements (signalization or roundabouts) at the intersections of US 97 and Shumway and US 97 and Sandflat. The intent behind the study was provide a foundation for the development of a SEPA mitigation program or adequacy of public facilities ordinance that could be used to collect fees from developers as a means to begin financing needed improvements.

Replacement of the Central Avenue Bridge has been an important issue to the City for over a two decades with repeated attempts to secure funding through both the State and Federal governments. ~~Until recently, V~~very little ~~actual~~ study had been devoted to analyzing potential locations for a new bridge. This changed in 2010 when the Tribes secured funding from the federal government to conduct a feasibility and site alternatives analysis. The results of the effort, which ~~are is~~ described later in this Element, determined the best, most efficient and most cost-effective solution was to replace the existing bridge at the current location in the heart of downtown Omak.

Completion of a safe pedestrian facility linking East Omak Elementary to the Middle/High School campus has been the subject of two attempts to secure funding through the Safe Routes to Schools Program. Unfortunately, those efforts were not successful but the city did secure a grant from the Transportation Improvement Board in 2010 to design and construct sidewalks from East Omak Elementary to Second Avenue near the Omak Visitors Center. The balance of the project will be pursued as funding becomes available.

In 1996, the County Commissioners created the Okanogan County Transit Authority (OCTA), which includes all but 432 square miles of Okanogan County. A citizen's advisory committee was formed to undertake a survey

to assess the need for public transportation. Survey results illustrated strong support for a countywide public transportation system. In its comprehensive plan, OCTA details policy and funding recommendations for this service. Despite the apparent support for public transportation, voters rejected special election proposition 1 on May 20, 1997, which would have funded a public transportation system in the Okanogan Public Transportation Benefit Area by instating a .04% sales tax.

The question of forming the OCTA was placed before the voters again in 2013 and this time public transit prevailed and Transportation for the Greater Okanogan (TRANGO) was established. TRANGO began providing service between Omak and Okanogan communities in 2015, and expanded service to Winthrop, Twisp, Pateros, Brewster, Tonasket, Riverside, Crumbacher and Oroville in 2016. The transit provider is in the process of locating and installing bus stops along its routes through Omak.

~~A current effort is underway through the North Central Washington Regional Transportation Planning Organization to update the transit study and provide a recommendation to Okanogan County and its incorporated communities on what type of system is desirable and what level of sales tax increase will be needed to develop such a system. The results of this effort will be available during spring or summer 2012.~~

In 2019, the Department of Transportation retained Perteet, an engineering firm, to conduct a study of 5 intersections along US 97 from the Twelve Tribes Casino north to Sandflat Road. The effort also included an examination of the need for a pedestrian crossing on SR 155 at East Omak Elementary and options for improvement to the Quince Street intersection with SR 215 (Riverside Drive). The results of this study informed this update of the Transportation Element.

In an effort to plan for non-motorized transportation, Okanogan County Office of Planning and Development undertook a study in 1994 to identify the scope, public support, funding, feasibility, and potential routes for a Greenway Trail that would link Omak and Okanogan. The resulting document ~~includes~~included background and context for a trail, land use specifics for the study area, route alternatives, and future connections. Although the idea still has support, there has been no sustained leadership and opposition from property owners along proposed routes has essentially stopped further exploration. Nonetheless, the analysis is useful as Omak works to provide more routes for pedestrians and bicycles. A renewed effort with determined citizen backing could bring a Greenway Trail under consideration again.

Two other forms of transportation are available in the Omak area: rail and air. The Cascade and Columbia River Railroad (CCRR), a subsidiary of ~~the Genesee & Wyoming Railroad~~Rail American, operates the short haul line from Wenatchee to Oroville. The CCRR provides an important means of transporting wood products, wood chips and ~~formerly~~ calcium carbonate out of and concrete into the Okanogan Valley. Recently the line has been hauling concrete from Seattle to Oroville for reloading onto trucks for export into Canada. Several businesses in the northern part of the County owe their existence to the ability to ship by rail and the access to this important means of transport is one of the attractive features of the Tribes planned industrial park. The designation of a Heavy Haul Corridor from the Border into Oroville has also provided continued business to the CCRR.

The Omak Municipal Airport, owned and operated by the City provides the second longest runway in north central Washington for general aviation aircraft, charter services and during the fire season, a base for SEAT bombers. The Omak Municipal Airport, an essential public facility, provides vital community services through air freight, air ambulance, charter flights and wildland fire fighting aviation (Helicopters and ~~retardant bombers~~fixed wing aircraft). The facility has been the focus of millions of dollars of federal and state grant funds used to maintain a high quality, 24/7 airport. The City has explored options for developing an airport related business and industry park on City-owned land adjoining the facility, with the biggest obstacle being water for fire flow.

~~In 2016, the Department of Natural Resources approached the City with the idea of developing a “fire base” on city property adjoining the airport. As a result of the partnership, a well has been drilled, plans prepared and funding pending to construct a reservoir and the DNR’s planned facility. and continues to look for options to provide water for fire flow. Lack of adequate water and specifically fire flow is the biggest obstacle to developing more business at the airport.~~

The above plans and studies anticipate that there will be further changes in vehicle travel and the bulk transport of materials to and through the Greater Omak Area as well as throughout the Okanogan Valley. Additionally, ~~the high level of~~ public support for public transit and non-motorized travel along bike paths and pedestrian ways indicates a need to incorporate planning for such alternatives. These are the issues that inform the goals and policies for transportation/circulation in the Greater Omak Area.

## Goals, Policies, and Objectives for Transportation/Circulation

The types of transportation considered in ~~this~~ plan include public transit, vehicular circulation, pedestrian, and non-motorized circulation. The following goals and policies are intended to guide decision-making regarding the transportation/circulation system in the Greater Omak Area.

### Goal 1 Establish a safe, efficient, and environmentally sensitive road system that supports desired development pattern.

#### Policies

- Policy 1.1: Encourage provision of a safe, efficient, and environmentally sensitive transportation/circulation system for the movement of goods, services and people to places of employment, shopping, education, recreation and residence within the area and region.
- Policy 1.2: Encourage development of an overall transportation/circulation system in the Greater Omak Area which is responsive to the Land Use Element, land ownership patterns, the Okanogan County Transportation Element, Colville Tribes Transportation Plan and the ~~North Central Okanogan~~ Regional Transportation Plan, prepared by the Okanogan Council of Governments.

#### Objectives

- Obj 1.1 That storm drain grates throughout the City be raised level to road surface to eliminate bicycle hazards.
- Obj 1.2 That ~~all~~ major construction or reconstruction of most existing or new streets and roads include provisions for pedestrian and non-motorized access.

### Goal 2: Utilize the existing vehicular, non-motorized, and pedestrian transportation systems and provide for upgrading and extension of these systems to serve future development and increased volumes.

#### Policies

- Policy 2.1: Encourage the provision of a vehicular, pedestrian, and non-motorized transportation/circulation system that connects land uses within the Greater Omak Area and other outlying areas and promotes efficient land use.

- Policy 2.2: Cooperatively evaluate existing and planned arterial and collector routes to meet State and Federal requirements and to provide guidelines for priority street improvement programs.
- Policy 2.3: Encourage the consideration of traffic control, turn lanes and other traffic channeling/calming devices as part of planning for new developments or improvements to existing transportation systems.
- Policy 2.4: Coordinate the development of standards for off street loading, parking and delivery service standards for new or substantially improved developments.
- Policy 2.5: Agree to cooperatively evaluate subdivision, binding site plan and Planned Development standards with respect to arterial and collector streets, access to public transit and pedestrian access combined with local access loops and the inclusion of alleys in new designs.
- Policy 2.6: Encourage the maintenance and development of vehicular transportation systems that operate at level of service C-D or above except during peak periods.
- Policy 2.7: Utilize state access management standards as a means to maintain safety and capacity on local state routes.
- ~~Policy 2.8: Coordinate with the Tribes and WSDOT on identifying and securing funding for replacement of the Central Avenue Bridge in its current location.~~

### Objectives

- Obj 2.1 Continue efforts to construct an east leg ~~of to~~ the ~~new~~ US 97/Shumway intersection with a connection to ~~either~~ Sandflat and ~~or~~ Engh Roads.
- Obj 2.2 Identify and encourage development of a frontage road along the east side of US 97 from Engh road via Enterprise Drive northward to ~~intersection of~~ Sand Flat Road in the vicinity of US and Highway 97.
- Obj 2.3 Continue efforts to develop and implement a design for improvements to the intersections of SR-215 with Grape Avenue, including eventual signalization of the adjacent intersection of SR 215 and Oak Street and SR 215 and Quince Street.
- Obj 2.4 Continue to study options and warrants for traffic controls at SR-215 and Ross Canyon Road.
- Obj 2.5 Continue efforts to identify options for improving the safety and efficiency of the Jasmine Street - SR-215 intersection.
- Obj 2.6 Develop a motorized access that connects Copple Road to Epley Road and provides a direct, low grade route to Conconully Highway.
- Obj 2.7 That the potential of acquiring right-of-way to develop a bridge over US 97 to connect Dewberry with the Omak River Road (formerly Dewberry extension prior to the construction of US 97) be examined. This new facility may mean the upgrade of the eastern portions of Dewberry from a minor collector to major collector. Development of this facility should be tied to future growth and annexation.

## **Goal 3: Provide safe and convenient pedestrian and non-motorized transportation routes.**

### Policies

- Policy 3.1: Recognize the importance of pedestrian and non-motorized travel in contributing to the physical health of residents and the economic wellbeing of the Greater Omak community.
- Policy 3.2: Provide standards and alternatives for road widths that include pedestrian routes and other non-motorized transportation/circulation corridors.
- Policy 3.3: Encourage development of street systems and standards that complement new utility, non-motorized, and pedestrian pathways with a “neighborhood” approach so that the service patterns can be coordinated and therefore serve more than one purpose in the most economical way.
- Policy 3.4: Agree to explore options for constructing trails and pathways, such as the proposed Okanogan-Omak Greenway, which would provide connections among recreation sites and community features.

### Objectives

- Obj 3.1 Require all substantially improved or new developments to provide sidewalks or other forms of pedestrian and non-motorized transportation.
- Obj 3.2 Strive to provide sidewalks or other off-street pedestrian ways on both sides of ~~all~~ identified roadways within the city.
- Obj 3.3 Strive to provide bike lanes on all arterial and collector classified roadways.
- Obj 3.4 Provide alternative standards so that while concrete sidewalks are preferred, walkways that use other types of surfacing can satisfy the demand for safe pedestrian circulation routes.
- Obj 3.5 Continue efforts to develop the Cariboo Trail (Greenway) as a pedestrian and non-motorized link between Omak and Okanogan.
- Obj 3.6 Assign top priority to development of pedestrian and non-motorized transportation links between public facilities.
- Obj 3.7 Initiate amendments to city, county and tribal land use codes to increase requirements for pedestrian and non-motorized access in new developments.
- Obj 3.8 That new construction, reconstruction, or overlay projects include smooth shoulders wherever possible to facilitate safer, more convenient bicycle travel.
- ~~Obj 3.9 — That pedestrian bulb-outs or other pedestrian safety improvements be included in any upgrades or repairs on Main Street (SR 215) between Third and Cherry Avenues.~~

**Goal 4: Participate in cooperative transportation/circulation planning efforts and provide for an equitable distribution of new development costs, services and maintenance between local governments and developers.**

### Policies

- Policy 4.1: Continue to support and participate in the ~~Regional Transportation Planning Organization~~ Okanogan Council of Governments (OCOG RTPO) comprised of ~~Okanogan, Chelan and Douglas Counties~~ representatives from Okanogan County, its Cities and Towns, the Colville Tribes, incorporated communities and other interested agencies agencies and businesses within the named counties.

- Policy 4.2: Engage developers in cooperative transportation planning efforts to meet the needs of existing and new residential, commercial, or industrial development.
- Policy 4.3: Ensure that developers fund an equitable share of ~~the~~ vehicle, pedestrian, and non-motorized transportation improvements, service, and maintenance necessary to accommodate development.

### Objectives

- Obj 4.1 Continue work with WSDOT, qualified engineers/transportation planners, and land owners to ~~develop a preferred~~ implement improvements option to ease current and projected traffic flow problems at the intersections of US 97, Omache Drive and Quince Street with SR 215.
- Obj 4.2 Continue efforts to refine and implement recommendations of SR215 Corridor Study.

## **Goal 5: Encourage public transportation (air, rail, and bus) and the provision of central facilities for these uses.**

### Policies

- Policy 5.1: Continue ~~to support and cooperate with TRANGO in the implementation to participate in efforts to establish a of the~~ public transportation system ~~to serving the Greater Omak Area and the Okanogan County.~~
- Policy 5.2: Support the periodic efforts to ~~establishment of a~~ passenger air service at the Omak Municipal Airport.
- Policy 5.3: Encourage continued operation of the railroad as an important means of transporting goods into and out of the valley.

### Objectives

- Obj 5.1 ~~Continue to support efforts to bring Public Transit to the Central Okanogan Valley and Okanogan County~~ Work with TRANGO on an agreement for the placement and maintenance of bus stops within city-owned rights-of-way.
- Obj 5.2 Continue efforts to upgrade and expand facilities at the Omak Airport, specifically ~~the development of a water source~~ completion of a fire flow system for the DNR Fire Base and potential for industrial development at the site and projects described in the adopted Airport Layout Plan.
- Obj 5.3 Coordinate with Okanogan County on ~~the development and~~ implementation of zoning regulations to protect the Omak Airport from incompatible land uses.

## **Goal 6: Improve recognition and alignments of the main access points to US 97, and explore possibilities for new access points.**

### Policies

- Policy 6.1: Continue ~~to study and evaluate cooperation with the WSDOT on identifying and implementing~~ improvements to ed intersections along US 97, ~~both east and west of the Okanogan River and pursue such improvements with the WSDOT.~~

Policy 6.2: Perform on-going evaluations of the SR-215/US 97 intersection for safety improvements.

**Objectives**

Obj 6.1 Continue efforts to improve the intersection of US 97 and SR 215/Engh Road to create a safe, attractive, and functional entrance to the community.

Obj 6.2 Coordinate with WSDOT on traffic management and improvements.

Obj 6.3 Work with WSDOT, business owners, Omak Tree Board, and Chamber of Commerce to develop a portal park at southwest corner of the intersection.

## 1. PUBLIC TRANSPORTATION

### **Surface Transit:**

Empire Buslines formerly supplied regional public transport. This service was discontinued in 1995.

In March 2000, a demonstration Intercity Bus Service, the Appleline, funded by WSDOT began providing public transportation throughout Okanogan County with connections to Wenatchee. The program represented a coordinated effort between Okanogan County Public Transportation Benefit Area (PTBA), Okanogan County Transportation (operated by Okanogan County Senior Citizens Association), and Northwestern Trailways. The project was short lived but did document the public transportation needs of Okanogan County.

At present, the Appleline, a state subsidized service, operates 7 days per week. Their website is <http://www.appleline.us/>.

~~provides 5 day a week service to Wenatchee.~~

### **Okanogan County Transportation & Nutrition:**

The Okanogan County Transportation & Nutrition organization has contracts through ~~Aging & Adult Care of Central Washington-OCTA, the CCTDOT, and the WSDOT Consolidated Grants Program. Sometimes that means federal funds, sometimes just state funds. The current federal authorization is the FAST Act and other state and federal sources to provide door to door transportation for seniors not only in the Greater Omak Area but also throughout most of Okanogan County. Their services can be found at <https://www.octn.org/what-we-do/transportation/>.~~

~~The transportation program began in 1976. One intercity route connecting the north county to Omak makes 3 round trips per day Monday through Friday, and one intercity route connecting the south county to Omak makes 2 round trips per day Monday through Thursday. A shuttle route runs hourly between Omak and Okanogan Monday through Friday between 8am and 4 pm. Currently there are 13 buses in the system countywide. All buses are accessible for wheelchairs. Door to door transportation has one bus serving the Methow; one the Tonasket area; one the Oroville area; one the Brewster/Pateros area; and four serving the Omak/Okanogan area. Two buses are held as backup.~~

### **TranGO:**

The mission of TranGO is to provide safe, reliable and cost effective public transportation services that promote citizen access to work, recreation, commerce and public services. TranGo is the result of the passage of a Transportation Benefit Area which provides tax dollars for

~~the operation and maintenance of a public transit system serving the Okanogan and Methow Valleys. Buses run 6 days per week with scheduled inter-city bus service. Bus schedules and fares can be found at [www.okanogantransit.com](http://www.okanogantransit.com).~~

~~Although originally the service was oriented towards senior citizens and disabled persons, it now serves the entire general public. Local service is available Monday through Friday from 7 to 5. Office hours are the same and rides can be scheduled by calling the office. The fare for door-to-door riders from the general public is \$1 per boarding in the city limits and \$2 per boarding beyond for travel beyond the city limits. Senior citizens receive the service for on a donation basis. Intercity route fares are based on trip origination and destination, shuttle fares are 50¢ per boarding. Trips are available from all areas to Wenatchee once each month and to Omak from outlying communities once each month.~~

~~An employment route between Omak/Nespelem/Tribal Agency/Coulee Dam currently runs Monday through Friday with 2 round trips per day in partnership with the Colville Confederated Tribes. The Tribe provides the bus for this route. This is a no fare route and is open to the general public.~~

~~Funding sources include AACCW, FTA, WSDOT, participant donations and community donations and business partners within the community to assist in providing match for grant funds.~~

### **Tribal Van Pool:**

The Colville Confederated Tribes run a van each day from East Omak to Nespelem that provides Tribal employees with an alternative to driving their own vehicles. The pool is utilized by an average of 27 people per day and has been in operation since 1993.

## **2. AIR TRANSPORT**

The Omak Municipal Airport was built in 1942 as the Okanogan Flight Strip, and served as an Army Air Force alternate landing field for B-17 and B-26 bombers during World War II. Its construction consisted primarily of a 4,654-foot long, 150-foot wide paved runway running generally north/south, with 175-foot wide graded shoulders and graded overrun areas 1,675 feet long at each end. The runway was reconstructed in 2002 with the main runway width reduced to 75 feet.

In 1954 the airport was turned over to the City of Omak, which has since made a variety of improvements to the facility, most with the assistance of the Federal Aviation Administration, and the Washington State Department of Transportation Aviation Division. A major improvement was made in 1974, including runway end turnaround loops, an aircraft parking apron pavement overlay, 3.5 acres of new apron, Visual Approach Slope Indicators, and an airport beacon. ~~An modern~~ administration and terminal building was ~~built constructed~~ in 1978.

Today, the airport serves a vital transportation need providing for emergency medical evacuations, access for executives and officials from government and private industry doing business in Okanogan County, air freight services and firefighting.

~~Today,~~ the airport has a ~~new~~ 75-foot wide (150-foot total width) north/south runway, designated as Runway 17/35 with four taxi-ways connecting to a parallel taxi-way constructed in 1991. The runway has a listed weight bearing capacity of 75,000 pounds for single-wheel aircraft, 200,000 pounds for dual-wheel aircraft, and 400,000 pounds for dual-tandem wheel aircraft.

The facility has runway end identifier lights (REILS), a visual approach slope indicator (VASI U22/U22) on both ends of Runway 17/35, and runway edge lights. All lights are pilot activated using the airport code.

The airport is located at an elevation of 1,301 feet above sea level on 325 acres of open bench land, approximately 400 feet above the Okanogan River. The facility lies approximately 3 miles north of the city on Robinson Canyon Road. The site is bounded on north, west and south by growing low-density residential and agricultural uses. Immediately east of the hangar is one airport related business. This business is located on private property and has unrestricted access to the airport. A former Forest Service air tanker base is located on the southeast edge of the runway just off the turn-around. The base, which is leased seasonally to the Bureau of Indian Affairs ~~and Department of Natural Resources over the past few years~~, has an office, a trailer, four fire retardant tanks, and two sheds.

In addition to the improvements listed above, the airport has a card lock fueling facility, supplying both 100LL and Jet A. The fueling apron and facilities are located south of the terminal building; there are two above ground tanks, each holding 10,000 gallons. The Airport's apron areas have 25 aircraft tie-downs. There are nine hangers for aircraft storage and maintenance, all are privately owned. A city employee serves as manager on an as needed basis with oversight provided by the Public Works Director, and an Airport Committee.

An Airport Layout and Improvement Plan was prepared in 2007.

Another portion of the layout plan is the planned addition of an industrial park to be located on the southeast corner of the airport property (parcel lies east of Robinson Canyon Road). The City, using a mix of grants and city funds, has developed a conceptual master plan for the proposed business and industry park. One major obstacle ~~is has been~~ the lack of fire flow available to the property. The ~~only re is an~~ existing well ~~that~~ has been used by the DNR and BIA, ~~however there are questions regarding use of the well but was determined to be insufficient for the proposed the industrial park. In 2016, the Department of Natural Resources approached the City with the idea of developing an operations center on city property envisioned for the industrial park. As a result of the partnership, a well has been drilled, plans prepared and funding pending to construct a reservoir and the DNR's planned facility. Water supply is sufficient for current plans, however as development occurs, further sources and storage will be needed. Generally, the city does not anticipate development that will involve high levels of water use.~~

Increased community awareness and support of the Omak Airport is necessary to allow continued growth and improvement to services provided by the airport, and to further enhance the growth of the City of Omak and Okanogan County.

### 3. VEHICULAR CIRCULATION

The Greater Omak Area, particularly the northeast part of Omak, has experienced significant surges of growth in the past ~~couple of three~~ decades. Growth and projections for continued activity have resulted in an increased need to plan for both vehicular and non-motorized transportation/circulation. COVTS, NWOTS, the SR-215 Corridor Study and the Engh Road/US 97 Intersection Study each identify areas where reduced levels of service and increased congestion are expected in coming years.

The State highway system incorporates US 97/SR 20 as the major north-south route through North Central Washington; SR 155 as access to the Colville Reservation, Coulee Dam, Spokane, and other points to the east and south; and SR 215 as the main business thoroughfare for both Okanogan and Omak. The area is further served by a network of collector streets and roads maintained by the tribes, county and city. As growth continues and fuel costs fluctuate, and as more people explore non-motorized or public transit options, uses of the vehicle transportation system can be expected to fluctuate.

The Central Avenue Bridge is ~~an 9096~~-year-old bridge – construction was completed in 1924. The bridge is known to the WDOT as Bridge 155/111SP because it is a part of SR 155 spur that connects SR 155 along Omak Avenue and Central Avenue to the Junction with SR 215. And the present bridge is identified as needing replacement, under the Subprogram I1 Mobility 20-year Strategies, in the Washington State Highway System

Plan (HSP).

The bridge is essential to the community for transportation circulation. It is the only pedestrian access across the Okanogan River between west and east Omak. The bridge is a transportation bottleneck – too narrow for today’s safety standards. It is an accident risk for vehicles and pedestrians. It is an important pedestrian route for school children.

The bridge is slated for a significant improvement in the next few years with the first step construction of a standalone pedestrian bridge north of the existing structure. The bridge itself will see the sidewalk along one side removed, the area reinforced and the roadway surface widened.

The State and County use five “functional classifications” for roadways, and in the interest of maintaining consistency, Omak has used these categories in addition to its own categories of local major and local minor collectors to describe the vehicular transportation system. Where appropriate, roadways should be considered for reclassification in order to ensure consistency between this plan and other city, county, regional, or state transportation plans. The seven functional classifications, as they apply to Omak, are:

- ~~Principal Arterial~~ ~~Other Freeway Expressway (Rural Interstate)~~ - ~~Streets and~~ ~~H~~highways which contain the greatest portion of through or long-distance travel. Such facilities serve the high-volume travel corridors that connect the major generators of traffic. The selected routes provide an integrated system for complete circulation of traffic, including ties to the major rural highways entering the urban area. Generally major arterials include high traffic volume streets. In the Greater Omak Area, US Highway 97/SR 20 is classified as an ~~Other Freeway Expressway-Principle Arterial~~.
- Minor Arterial (~~Rural Minor~~)-- Streets and highways which connect with remaining arterial and collector roads that extend into the urban area. Minor arterial streets and highways serve less concentrated traffic-generating areas such as neighborhood shopping centers and schools. Minor arterial streets serve as boundaries to neighborhoods and collect traffic from collector streets. Although the predominant function of minor arterial streets is the movement of through traffic, they also provide for considerable local traffic that originates or is destined to points along the corridor. Minor Arterials in the Omak area include SR-215 (~~Okoma Drive, Fourth Avenue, Main Street and Riverside Drive~~), SR-155 (~~Omak Avenue~~) and the ~~SR 155 Spur~~ (Dayton Street) exit off of ~~Highway~~US 97.
- Major Collector (~~Rural Major Collector~~) - These routes should provide service to the county seat if not on an arterial route ~~or Other Freeway Expressway~~, to larger towns not directly served by the higher systems, and to other traffic generators of equivalent inter-county importance, such as consolidated schools, shipping points, county parks, important agricultural areas, etc. In addition, these routes should link larger towns and/or cities with routes of higher classification, and should serve the more important inter-county travel corridors. Major collectors in the Greater Omak Area include, Conconully Highway, Oak St/Robinson Canyon Road, Cherry St/Kermel Road and the Old Riverside Highway.
- Minor Collector (~~Rural Minor Collector~~) - These routes should be spaced at intervals, consistent with population density, collect traffic from local roads and bring all developed areas within a reasonable distance of a collector road. In addition, these routes should provide service to the remaining smaller communities, and link the locally important traffic generators with their rural hinterland. Minor collectors in the Greater Omak Area include, Ross Canyon Road, Duck Lake Road, Engh Road, Sandflat Road, Eighth Avenue East, Jackson Avenue, Rodeo Trail Road and the Columbia River Road.
- Local Major Collector - These routes should provide service from higher classified roads and to other traffic generators, such as schools, shipping points, commercial areas, developed residential areas, parks, important agricultural areas, etc. In addition, these routes should link larger towns and/or cities with routes of higher classification, and should serve the more important inter-county travel corridors. Local Major collectors in the Greater Omak Area include, Copple Road, Shumway Road/Ironwood St.,

W. Bartlett/Jasmine St., Ash St., Omache Drive, Koala Drive, Quince St., Oak St., Dewberry Ave., Locust St./Hopfer Road, Fourth Ave. and Garfield St./Fifth Ave./Edmonds St.

- Local Minor Collector - These routes should be spaced at intervals, consistent with population density, collect traffic from local access roads and bring all developed areas within a reasonable distance of minor collectors and local and major collectors. Local Minor collectors in the Greater Omak Area include, W. Apple Ave., Central Ave., First Ave., Second Ave., Third Ave., W. Sixth Ave. Emery St., Ridge St/Ridge Drive, Columbia St./Fifth Ave./Benton St., N. Ash St./Grape Ave./Ironwood St., Grape Ave.
- Local Access (Rural Unclassified) - Streets not selected for inclusion in the arterial or collector classes. They allow access to individual homes, shops, and similar traffic destinations. Direct access to abutting land is essential, for all traffic originates from or is destined to abutting land. Through traffic should be discouraged by appropriate geometric design and/or traffic control devices. The remainder of Omak’s streets that are not classified above are designated as local access.

Tables B.2 and B.3 describe the design standards for roadways by these functional classifications. Maps B.1 and B.2 [in the Map Appendix](#) illustrate Omak’s vehicle transportation system according to functional classifications.

**Table B.2 - Design Standards – State and Federal Classified Roads**

Functional Classification	Right-of-Way Width	Roadway Width	Access Conditions	Design and Location Features
<b>Principal Arterial</b> <b>Other Freeway Expressway</b>	80 – 100 ft.	4 lanes desirable; 2 lanes acceptable with 12 ft lanes and minimum 4 ft shoulders.	Intersection at grade with direct access to adjacent property.	Generally high-volume travel corridors that provide for through travel and serve as connection to lower roadway functional classifications. Direct private access is typically not permitted. The city of Omak adopted Ordinance 1234, dated 09/07/1993 to implement RCW 47.50.030(3) for access permitting on state managed access highways that meet or exceed WSDOT’s standards; as codified in WAC 468-51 and 468-52.
<b>Minor Arterial</b>	84 ft.	4 lanes desirable; 2 lanes acceptable with 12 ft lanes and minimum 4 ft shoulders.	Intersection at grade with direct access to adjacent property.	Generally located to continue access from the County’s arterial system into the City, providing access to major developments. Surfacing should be asphalt, concrete or a mixture of the two. Provisions should be made for pedestrian and bicycle access along the route.

<p><b>Major Collector</b></p>	<p>60 – 80 ft.</p>	<p>2 lanes, 10 - 12 ft wide and 2 parking lanes 8 ft wide.</p>	<p>Intersection at grade with direct access to adjacent property.</p>	<p>Generally located to provide access to the community’s major developments, schools, parks, and shopping areas. Surfacing should be asphalt, concrete or a mixture of the two. Provisions should be made for pedestrian and bicycle access along the route.</p>
<p><b>Minor Collector</b></p>	<p>60 – 66 ft.</p>	<p>2 lanes, 10 - 12 ft wide and 2 parking lanes 8 ft wide.</p>	<p>Intersection at grade with direct access to adjacent property.</p>	<p>Located so as to channel traffic between residential areas and higher traffic areas such as downtown and arterials. Surfacing should be asphalt, concrete or a mixture of the two. Provisions should be made for pedestrian and bicycle access along the route.</p>

**Table B.3 - Design Standards – Locally Classified Roads**

<b>Functional Classification</b>	<b>Right-of-Way Width</b>	<b>Roadway Width</b>	<b>Access Conditions</b>	<b>Design and Location Features</b>
<b>Local Major Collector</b>	60 – 80 ft.	2 lanes, 10 - 12 ft wide and 2 parking lanes 8 ft wide or 2 10-12 foot travel lanes, 10-12 foot center turn lane and 4 foot shoulders	Intersection at grade with direct access to adjacent property.	Generally located to provide access to the community’s major developments, schools, parks, and shopping areas. Surfacing should be asphalt, concrete or a mixture of the two. Provisions should be made for pedestrian and bicycle access along the route.
<b>Local Minor Collector</b>	60 – 66 ft.	2 lanes, 10 - 12 ft wide and 2 parking lanes 8 ft wide. wide or 2 10-12 foot travel lanes, 10-12 foot center turn lane and 4 foot shoulders	Intersection at grade with direct access to adjacent property.	Located so as to channel traffic between residential areas and higher traffic areas such as downtown and arterials. Surfacing should be asphalt, concrete or a mixture of the two. Provisions should be made for pedestrian and bicycle access along the route.
<b>Local Access</b>	<del>50--60</del> 40-50 ft. At less than 500' long, need 50-60' and 100' cul-de-sac <del>over</del> 500' long.	Over 500 ft long: two 10 ft lanes, and two 8 ft parking lanes. Less than 500 ft long and not extendable: two 10 ft lanes and one 8 ft parking lane.	Intersection at grade with direct access to adjacent property.	Traffic control measures as warranted to provide adequate sight distance and safety. Should be designed and located to prevent continuous or unobstructed flow of traffic through residential areas. Provisions should be made for pedestrian and bicycle access along the route.

**Level-of-Service Standards**

Roadway and bridge operations are typically classified using national or state standards which measure a roadway’s level-of-service (LOS). In general, Level-of-Service for two lane highways is determined by both mobility and accessibility. The primary measure of service quality is percent time delay, with speed and capacity utilization used as secondary measures. For state owned transportation facilities, level of service standards for highways, as prescribed in chapter 47.06 and 47.80 RCW, gauge the performance of the system.

- WSDOT sets LOS standards for state highways and ferry routes of state wide significance (HSS) per RCW 47.16.140(2).
- LOS standards for Highways of Statewide Significance (HSS) and non-HSS facilities are identified in the WSDOT 2007-2026 Highway System Plan.
- US 97 and SR 20 are classified as Highways of Statewide Significance (HSS).

- RTPO's and WSDOT jointly develop and RTPO's establish LOS standards for regionally significant state highways and ferry routes per RCW 47.800.030(1)(c).

Level of Service is general graded one of six levels--A, B, C, D, E, or F. LOS A and B represent the best traffic operation. LOS C represents acceptable traffic operation. LOS D is unacceptable. LOS E means the roadway is at capacity while LOS F represents total breakdown or gridlock. The Central Okanogan Transportation Study (1994) determined the LOS for major roadways. That information is presented below in Table B.4.

**Table B.4 - Level of Service**

Roadway	LOS
SR 97	C
SR 20	C
SR 215	B-C*
SR 155	B-C*
* Isolated segments approach volumes normally associated with LOS C.	

**Level-of-Service Standards - Bridges**

*Central Avenue Bridge (Bridge Number 155/111SP) Details*

- Location: State Route 155 Spur-Omak at MP 80.40 to MP 80.48 crossing the Okanogan River in the City of Omak.
- State Route: Rural Minor Arterial Classification
- Posted Speed: 25 MPH
- Construction: 443 ft. long concrete arch bridge completed 1924. 2 – 10 ft. wide lanes, with 5 ft. sidewalks on each side (In an effort to protect pedestrians, steel posts and rails were installed 1960 on the north sidewalk narrowing the walk to 3 ft. 2 in. wide)

Bridge Approaches

- West Approach: Central Avenue is 223 ft. long from the signalized intersection with SR 215 – Main Street – to an angle point at the west end of the bridge. Central Avenue is 54 ft. wide between Main Street and the west bridge end, with two 13.5 ft. lanes, an 11 ft. left turn, and 8 ft. parking lanes both sides. At the angle point on the west end of the bridge, two 13.5 ft. lanes, and the 11 ft. left turn lane, narrow to two 10 ft. wide bridge lanes.
- East Approach: Omak Avenue transitions in 321 ft. from the same 54 ft. wide roadway width as Central Avenue to the two 10 ft. bridge lanes, with an angle point in the middle of the transition.

Operational Uses:

The bridge is the only pedestrian access across the Okanogan River that bisects residential and commercial areas of the City of Omak. It is used by children walking to Omak High School located four blocks west of the bridge and to East Omak Elementary School located .5 miles east of the bridge.

The bridge is the principal city access across the river for police, fire trucks, and other emergency vehicles.

Besides passenger vehicles, the bridge is used by school buses, logging trucks, freight trucks, RVs, and snow plows. At the angle at the west end of the bridge, an eastbound vehicle, with a long wheelbase, will occasionally ride up over the sidewalk as the driver tries to avoid oncoming vehicles – a hazard to pedestrians.

Located at the east end of the bridge, the Eastside Park and Stampede Grounds hosts the famous Omak Stampede rodeo and Suicide Race – a cultural and historical event important to the region and local economy. Pedestrian and vehicle traffic across the bridge is greatly increased during this annual event.

The WSDOT Annual Traffic Report records a year 2002 average annual daily traffic volume of 7,900 across the bridge – an increase of 6.8% over the 1999 volume, however this declined to an average annual daily traffic volume of 6,100 in 2019. This volume is based on an actual traffic count that is averaged across 24 hours a day for the entire year. Community residents know that the traffic volumes are much higher during start and end times for schools, for daily work start and end times, and during the Omak Stampede.

The WSDOT Accident History Report, for a fiveten-year period ending December 31, 2003 beginning in 2010, records four thirteen reported accidents, — all minor non-injury — from the SR 155 Junction Benton Street east of the bridge to the SR 215 Junction at Main Street.

The bridge also carries a 12-inch City water main across the river from wells in east Omak.

#### 4. PEDESTRIAN/NON-MOTORIZED CIRCULATION

Presently, pedestrian access ways are limited to sidewalks in and/or near the downtown core and along one side of SR 215. The Greater Omak Area generally suffers from a lack of safe and convenient pedestrian routes, as evidenced by accidents and fatalities. Some high traffic areas, such as segments of Quince, Koala Drive and Shumway lack sidewalks. The fact that there are limited sidewalks connecting downtown and residential areas to Omak Schools raises particular concern about the safety of children. Striped and designated bike lanes are notably absent on frequently traveled routes. This plan calls for improvements and additions to the existing sidewalks, and the development of new routes for pedestrians, bicycles, and other forms of non-motorized transportation. Maps B.3 and B.4 in the Map Appendix depict existing pedestrian and non-motorized circulation routes.

Walking and bicycling serve both transportation and recreation purposes. In the course of a day, virtually everyone is pedestrian. In fact, 40 percent of the population of the United States does not drive. There is significant evidence to indicate that pedestrian and non-motorized trail systems can bring economic revitalization to a community. Walking and biking routes help create a livable community for residents as well as attracting visitors.

The *Pedestrian Facilities Guidebook* for the state of Washington identifies a need to increase the level of pedestrian facilities that serve communities. The guidebook also notes that pedestrian travel increases where pedestrian facilities are available. The “Washington State Bicycle Facilities and Pedestrian Walkways Plan” and AASHTO Guide for the Development of Bicycle Facilities also provide valuable references for non-motorized improvements. An increase in pedestrian and non-motorized routes in the Greater Omak Area would lead to improved safety, as well as contribute substantially to the health of residents and the economic well-being of the area.

**Table B.6 - Recommended Dimensions for Sidewalks and Walkways**

<b>Road Type</b>	<b>Principal Arterial</b>	<b>Minor Arterial</b>	<b>Major Collector</b>	<b>Minor Collector</b>	<b>Local Residential</b>	<b>Commercial Access</b>
<b>Sidewalk Widths</b>						
No buffer						
Desirable	8 ft	8 ft	6 ft	6 ft	5 ft*	6 ft
Minimum	6 ft	5 ft	5 ft	5 ft	5 ft*	5 ft
With planting strip/buffer	6 ft	5 ft	5 ft	5 ft*	5 ft*	5 ft*
With street trees, no buffer	10 ft	10 ft	8 ft	8 ft	-----	-----
Central Business District	10 - 12 ft	8 - 12 ft	Varies	-----	-----	-----
<b>Location</b>						
Desirable					5	Both sides
Minimum	Both Sides	Both Sides	Both Sides	Both Sides	One Side**	One Side**
					or***	
<b>Planting Buffer Width When Used</b>						
Desirable	5 ft	5 ft	5 ft	5 ft	5 ft	5 ft
Minimum	4 ft	4 ft	4 ft	4 ft	4 ft	4 ft
* If mailboxes or other obstructions are located within sidewalk, make sure a clear width of 5 ft is provided.						
** In areas where residential densities exceed 4 dwelling units per acre and where regular pedestrian access to commercial services is anticipated, sidewalks on both sides are recommended. For densities of 1 to 4 dwelling units per acre or less, sidewalks on both sides are preferred, but one side is the minimum recommendation.						
*** If no sidewalk, provide delineated/striped walkways or shoulders.						

Sidewalks and paths/trails within right of way are the key to pedestrian circulation. Table B.6 above details WSDOT recommendations for sidewalk and path/trail dimensions. Sidewalks are typically constructed of concrete and are raised and located adjacent to curbs or separated from curbs by a linear planting strip. Paths/trails are usually constructed level with the street or road, with separation by a planting buffer or ditch.

Non-motorized transportation, typically by bicycle, is facilitated by adding bike lanes between motor vehicle lanes and sidewalks or paths/trails. This provides a buffer between pedestrians and motor vehicles. Figure B.1 illustrates a possible configuration for pedestrian walkways (sidewalks, paths and trails), bike lanes, and motor vehicle lanes. Pedestrian and non-motorized circulation can be further enhanced by trails and pathways that are independently aligned and allow safe travel along routes and not typically located parallel to streets or within road rights-of-way.

**Figure B.1 - Pedestrian, Bicycle, and Motor Lanes.**

## 5. RECOMMENDATIONS FOR TRANSPORTATION/CIRCULATION

### Vehicular Transportation

Continue to examine alternatives for relieving congestion in Downtown area through the following possibilities (see potential schematics in Figure B.2 below):

- **Replacement of Central Avenue Bridge in same location**
- One-way couplets along Main and Ash streets.
- Designate Ash Street as SR215, eliminate center lane on Main Street and provide for diagonal parking on both sides from Third north to Bartlett.
- Maintain Main Street as SR 215 but eliminate center lane on Main Street and provide for diagonal parking on both sides from Third north to Bartlett, route southbound traffic off Main to Ash via Barlett if desire is to head east on SR 155, route northbound traffic off of Fourth onto Ash if desire is to travel to High/Middle School Campus (no left turns at traffic signal at Main and Central).

**Figure B.2 - Schematics for downtown traffic control alternatives**

- **Add right hand turn lane on north side (westbound traffic) of SR 215 from US 97 to Omache Drive and continue working with WSDOT and adjoining landowners on long term solutions to improving traffic issues.**
- Adopt Level of Service D as the standard for area streets and roads.

- Update NWOTS study and begin planning for new road providing direct, reduced grade access from US 97 to Conconully Highway.
- ~~Add center turn lane on Quincee at the intersection with SR 215 (Riverside Drive).~~
- Extend left- ~~and right~~-hand turn pockets on Engh Road at signalized intersection with US 97.
- Widen SR 215 (Riverside Drive) to 5 lanes from Quincee to US 97 and Engh Road from US 97 to Omak River Road.
- Signalize the intersections of ~~Quincee~~, Oak St and Ross Canyon with SR 215 (Riverside Drive) when warrants are met.

Improve, construct, and/or reclassify the following roadways to Major Collector standards:

- Engh Road from US 97/Riverside Drive intersection east then north to intersection with US 97.
- ~~Robinson Canyon Road from Miller Road to Airport.~~
- ~~Old Riverside Highway from Copple Road to Omak Airport Road.~~
- ~~Omak Airport Road from Airport to Old Riverside Highway.~~
- Ross Canyon Road from ~~Ironwood Street~~Riverside Drive north and west to the Conconully Highway.
- Duck Lake Road from Ross Canyon to Nichols Road.
- Sand Flat Road from intersection with Engh Road north to intersection with US 97.

Improve, construct, and/or reclassify the following roadways to Minor Collector standards:

- ~~Sand Flat Road from intersection with Engh Road north to intersection with US 97.~~
- New road connecting US 97 (Tribal Trails fueling station) with Rodeo Trail.
- ~~Eighth Avenue/Edmonds Street/Fifth Avenue connection between Rodeo Trail and SR 155.~~
- Bartlett, Granite, Jasmine from Main St (SR 215) to Okoma Drive (SR 215).

Improve, construct, and/or reclassify the following roadways to Local Major Collector standards:

- Entire length of Shumway Road from US 97 ~~and to~~ Ironwood Street ~~and to~~ Ross Canyon Road.
- East leg of US 97/Shumway intersection.
- Copple Road from Robinson Canyon Road east to US 97.
- New road from Engh Road north to proposed frontage road along east side of US 97 northward to Sandflat with intersections with the east leg of Shumway and to Sandflat Road.
- Koala Avenue east from Locust/Hopfer Road to Koala Drive.
- Quincee Street from Koala Avenue to Shumway.
- Extension of Eighth Avenue to new road connecting with Tribal Trails Travel Plaza.

Improve, and construct the following roadways to Local Access standards:

- All residential streets in downtown/central Omak.
- New road providing access from Shumway to Wildwood.
- Jonathan Avenue from Oak Street east to Quincee Street.

- Koala Avenue from Kenwood Street east to Oak Street.
- New street running from Oak Street east connecting with Elderberry and proposed extension of Quince Street.
- Extension of Quince Street south from Riverside Drive (SR 215) to Dewberry.

### **Major Intersections:**

During 2019 the WSDOT retained Perteet Consultants<sup>1</sup> to conduct a review and prepare recommendations on improvements for five intersections along US 97 and one of SR 215 and pedestrian access across SR 155 at East Omak Elementary. Five of intersections are within the City Limits. Perteet's work included involvement of Omak, WSDOT, Tribal and County staff in site visits and meetings as well as several opportunities for the public to discuss and weigh in on various factors and options.

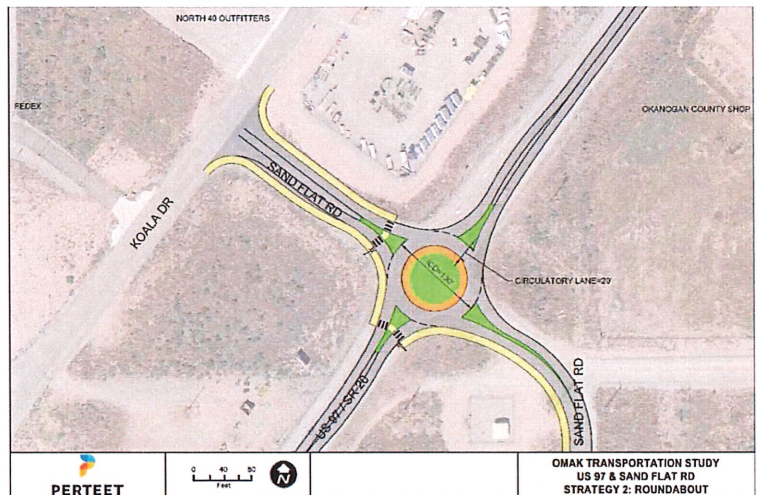

As part of this update to the Transportation Element, the Planning Commission reviewed the study, discussed the strategies proposed by the consultants and developed the following recommendations to set forth the City's vision for improvements at these vital state-owned, operated and maintained intersections.

#### **1. US 97/Sandflat**

The study contained the following strategies for this intersection:

- Extend 50-mph speed zone north of intersection
- Add single-lane roundabout
- Add traffic signal

After reviewing the report's findings, and considering the proposed large manufactured home park, and plans for the school district both on Sandflat Road, the recommendations for this intersection are:

#### **5. US 97/Dayton (SR 155 Spur)**

The report provided the following strategies for this intersection:

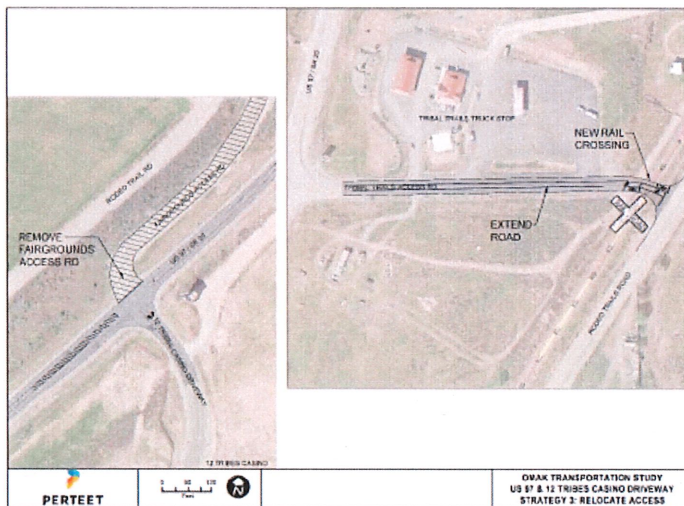

<sup>1</sup> - US 97 Omak Area Transportation Study, Perteet Engineers, June 28, 2019

- Modify existing signal from protected left to protected/permissive left turns with flashing yellow arrow
- Optimize signal timing
- Add sidewalks to community center

After reviewing the report's findings, the following recommendations are made:

Near Term 2-5 years:

- Modify existing signal from protected left to protected/permissive left turns with flashing yellow arrow
- Optimize signal timing
- Add sidewalks to community center and along Dayton to Omak Avenue

## 6. US 97/Twelve Tribes Resort

While outside the City limits, one of the strategies identified in the 2019 report has potential implications on traffic within the City. Extension of the road accessing Tribal Trails to cross the railroad and tie into Rodeo Trail as a means to mitigate for the closure of the Fairgrounds Access Road has positive and negative features. The route would provide an alternative for northbound US 97 traffic looking to go east on SR 155 which would route them through the edge of East Omak. This diversion of traffic would reduce the amount of left hand turn movements from northbound US 97 at Dayton Street.

This plan recommends that the City continue to coordinate with WSDOT, Tribes and County on

improvements proposed on US 97 both north and south of the City limits.

Maps B.5 and B.6 in the Map Appendix depict proposed motorized transportation improvements.

### **Pedestrian and Non-Motorized Circulation:**

That the following priorities for improvements to pedestrian circulation be pursued to provide safe and efficient access throughout the Planning Area. It is important to note that the priority for pedestrian and non-motorized circulation is related to the functional classification of the adjoining street or road, e.g. top priorities are facilities along arterials and major and minor collectors followed by local major and minor collectors.

- That the following design standards be adopted by the City and implemented through planning and regulatory programs:

- Bike Paths Within the Right of Way. Bike lanes with a minimum width of five feet should be developed in conjunction with all new and substantial upgrades to state highways, community arterials, and collectors. Surfacing for bike lanes should be comparable to that used on adjoining roadway.
  - Pedestrian Ways within the Right of Way. Sidewalks and pedestrian ways within the right of way should be constructed to a minimum width of five feet. Wherever possible sidewalks should be located along both sides of new or substantially improved streets/roadways. Surfacing should be constructed of asphalt or concrete, and must meet ADA guidelines for accessibility.
  - Bike Paths and Pedestrian Ways out of Right of Way (if connecting to other existing or planned pedestrian ways). Wherever possible and practical, development of bike paths and pedestrian ways with a minimum width of six feet one way or ten feet two way should be developed adjacent or in close proximity to community arterials, and community collectors, and residential access streets. Surfacing should be comparable to that used on roadways, but can be compacted gravel or other low maintenance surface.
  - Bike Path and Pedestrian Ways Not Tied to Vehicular Routes. Wherever possible and practical, development of bike paths and pedestrian ways with a minimum width of six feet one way or ten feet two way that are not tied to vehicular routes should be developed to provide linkages between public uses, residential and commercial areas. Such paths should be developed to provide alternative transportation routes for recreation and commuting. Surfacing should be compatible with the intended use, but at a minimum should be compacted gravel or other low maintenance surfaces.
- Identify, prioritize and replace existing deficient ADA ramps on all sidewalks.
  - Identify, prioritize and install new ADA ramps where none presently exist.
  - Review and amend City Code to require pedestrian improvements as part of all substantial improvements to existing development and all new development.
  - ~~Pedestrian bulb-outs at the intersections of Main with Third, Second, First, Apple and Bartlett.~~
  - Pedestrian Bulb-outs at the intersections of Ash with First, Central and Apple.
  - Pedestrian bridge parallel to SR 155 (Central Avenue) Bridge
  - Sidewalks from the downtown core up Ross Canyon (both sides) from Ironwood west to the City Limits.
  - Sidewalk on the south side of Shumway from Ironwood to Koala Drive.
  - Sidewalk along south and east sides of West Bartlett, Granite, and Jasmine Streets.
  - Sidewalks along ~~west both~~ sides of Central and Omak Avenue (SR 155) from ~~Granite Okanogan River Street~~ east to corporate limits.
  - Sidewalks along both sides of Sandflat from Engh Road north to US 97.
  - Sidewalk along the south side of Riverside Drive (SR 215) from downtown to US 97.
  - Sidewalks along both sides of Quince from Riverside to Koala and north to Shumway when street is constructed/extended.
  - ~~Sidewalks along both sides of SR 215 (Riverside Drive) east from Quince to US 97.~~
  - Sidewalks along both sides of Omache Drive from SR 215 (Riverside Drive) to Koala.
  - Sidewalk along the south side of ~~of~~ Okoma Drive from Fourth Ave to city limits.

- Sidewalks along both sides of Koala Drive.
- Sidewalk along south side of Dayton Street from US 97 to SR 155 (Omak Avenue).
- Sidewalks connecting Dayton Street with East Omak Community Center.
- Pedestrian connection north from Omak Avenue north to Engh Road/US 97 including improvements to existing or construction of a new bridge over the Okanogan River.
- Pedestrian connection south from Omak Avenue to the Tribal Trails Casino.
- Sidewalks as shown on Maps B.7 and B.8 in the Map Appendix.

That the following routes for bicycle circulation be pursued (combination of street widening and/or signage) to provide a readily identified safe and efficient access for bicycles throughout the Planning Area:

- Bike lanes along Rodeo Trail from Omak to Okanogan.
- Bike lanes from US 97 east and north along Engh Road to northerly intersection with US 97.
- Bike lanes along both sides of Central Avenue and SR 155 Omak Avenue) from Cedar Street east to corporate limits. Where practical and feasible, bike lanes may be combined with paths/trails.
- Bike lanes along Shumway from eastern city limit to northern city limits at Ironwood.
- Bike lanes along Copple Road from US 97 west to Robinson Canyon Road.
- Bike lanes along West Bartlett, Granite, and Jasmine Streets.
- Bike lanes along the length of Okoma Drive (SR 215).
- Bike lanes along the length of Riverside Drive (SR 215).
- Bike lanes along SR 215 from south City Limits to downtown Okanogan and beyond.
- Bike lanes along Ash Street from Fourth north to Cherry.
- Bike lanes along Fourth Ave from Ash to Granite.
- Bike lanes from Ross Canyon Road north along Duck Lake Road and up Ross Canyon to Conconully Highway, up Hendricks Rd to Dalton.
- Bikes lanes along Dalton from Hendricks to Kermal.
- Bike lanes along Cherry from Main Street (SR 215) west up Kermal to Conconully Highway.
- Bike lanes along Oak St/Robinson Canyon from Riverside Drive (SR 215) northward to the Omak Airport.
- Bike lanes along Quince (existing and proposed) and Koala Drive from Riverside Drive (SR 215) north to and including the Old Riverside Highway.
- Bike lanes along Engh Road from US 97 in the south to US 97 in the north.
- Bike lanes along Sandflat Road from Engh Road north to US 97.
- Bike lanes along Omak River Road from Engh Road to Orchard View Road then north to Engh Road.
- Bike lanes along Benton Street from SR 155 (Omak Avenue) south to the Omak Community Center.
- Bike lanes along the Hanford St, Fifth Ave, Edmonds St, Eighth Ave and Jackson St loop connection with SR 155.

- Bike lanes on Grape Avenue from Ross Canyon east to Riverside Drive (SR 215).
- Bikes lanes on Locust Street north from Grape to Shumway.

That the following priorities for development of paths/trails be pursued to provide safe and efficient access throughout the Planning Area. Where practical and feasible paths/trails may also serve bicycles, equestrians, etc...:

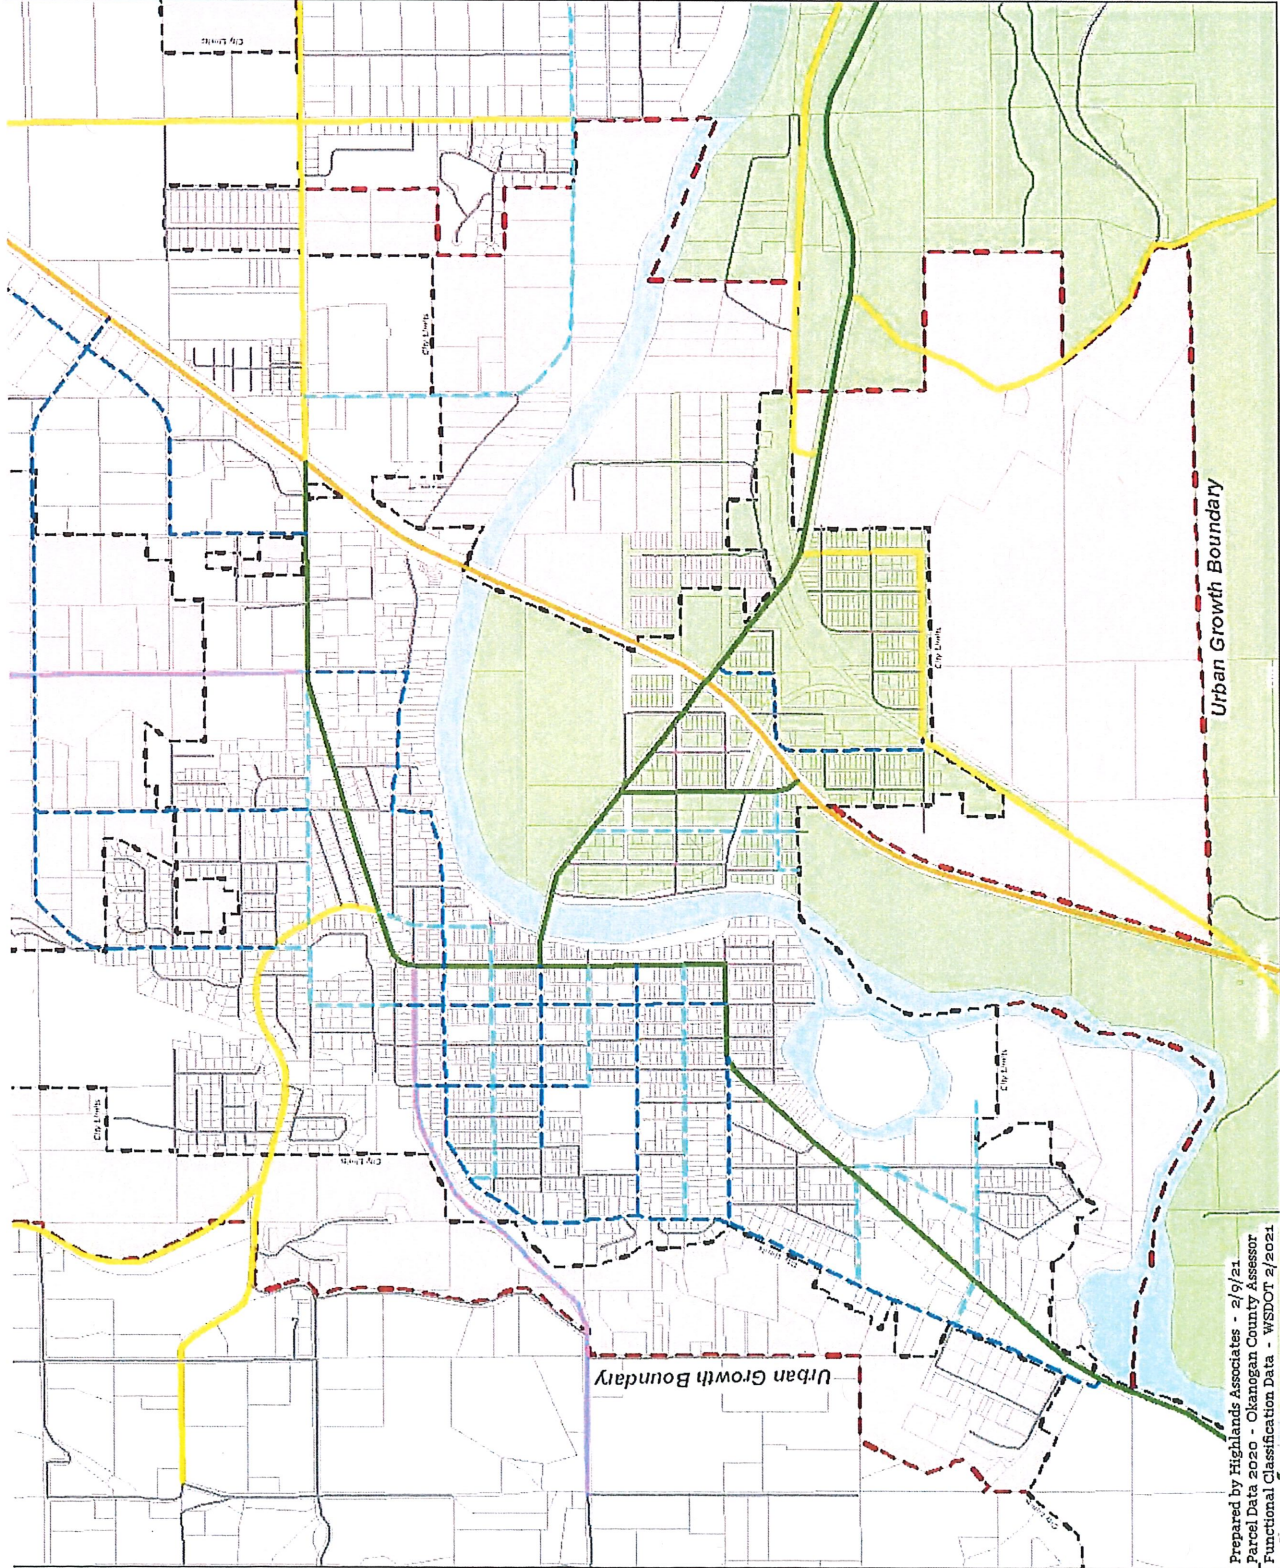

- Omak/Okanogan Greenway linking Eastside Park with the County Fairgrounds, Okanogan Sports Plex and Alma Park.
- Path/trail along Ross Canyon from city limits north to Duck Lake road and beyond to the Conconully Highway.
- Path/trail along north and west side of Shumway from city limits at Ironwood to city limits near Apple Springs.
- Path/trail along the south side of Copple Road from Koala west to Robinson Canyon.
- Path/trail connecting Cherry Street with Ross Canyon up the old road through the canyon along the western edge of the Harrison Addition.
- ~~Path/trail between Eastside Park and Omache shopping center area along US 97 and via bridge under US 97 bridge at Eastside Park.~~
- Path/trail from East Omak Community Center along flood control levee north to Eastside Park and US 97 bridge.
- Path/trail along Robinson Canyon from Riverside Drive north, with special priority being access to the school.
- Path/trail between Omak and Okanogan (Greenway).
- Path/trail along Cherry and Kermel Grade from Main Street.
- Path/trail along the top of the levee on west side of Okanogan River linking Pioneer Park and Aston Island Park.

Maps B.7 and B.8 in the Maps Appendix depict proposed pedestrian and non-motorized circulation routes.
